Professional Summary

Hi, I'm a Python developer who enjoys building tools and automation that make everyday work smoother for other people. Over the past few years I've created hardware test automation frameworks and a range of internal applications that helped my colleagues save time and reduce friction in their workflows.

As a mid-level Python developer I care a lot about reliability and good developer experience — whether that means cleaner test suites, simpler internal tools, or processes that actually feel pleasant to use. I pick up new technologies quickly and like working closely with teams to turn ideas into something practical and useful.

Experience

Test Automation Engineer & Software Developer

Siemens — Prague, Czech Republic

April 2022 – February 2026 (3 years 11 months)

- Designed and implemented a **test automation framework** adopted by **more than 10 teams** with potential for worldwide deployment across Siemens.
- Significantly improved testing efficiency — **reduced testing time by at least 2x** compared to previous approaches.
- Implemented and maintained **dozens of internal tools** that increased productivity for colleagues.
- Successfully transitioned from hardware testing role to full software development position using Python.
- Demonstrated **fast adaptation to new technologies**, tools, and processes (Azure DevOps, CI/CD, static analysis, etc.).
- Worked with **Git, Azure DevOps** (repositories, pipelines, test plans, boards) and integration of multiple internal applications.
- Actively promoted knowledge sharing, close team collaboration, and continuous process improvements.

Programming Instructor

Logiscool Ltd. — Prague, Czech Republic

October 2021 – June 2022 (9 months)

- Taught **Python and Unity game development** to children and teenagers (beginner to intermediate level).

Software Developer

Technická univerzita v Liberci — Liberec, Czech Republic

November 2018 – July 2019 (9 months)

- Developed applications using **Unity for HoloLens** (augmented reality).

HW Technician (Internship)

Solar Monitor s.r.o. — Turnov, Czech Republic

June 2018 – August 2018 (3 months)

- Practical internship focused on **hardware assembly** and maintenance.
 - Primarily worked with hardware components and performed soldering of parts.
-

Education

České vysoké učení technické v Praze (ČVUT)

Fakulta informačních technologií – Znalostní inženýrství

2020 – 2021

Střední průmyslová škola strojní a elektrotechnická a Vyšší odborná škola

Computer and Information Sciences, General

2016 – 2020

Certifications

- Cisco Linux Essentials — Cisco, January 2020
 - Cisco IT Essentials — Cisco, January 2018
-

Skills

Programming Languages

- Python (advanced)
- C#, C/C++, JavaScript

Key Libraries & Frameworks

- Pytest, FastAPI, OpenCV, Pydantic, PyQt, Flask, NumPy, React

Tools & Technologies

- Linux, Bash scripting, Git, Azure DevOps (Pipelines, Repos, Boards, Test Plans), REST API, CI/CD, Static Analysis, Test Automation Frameworks

Other

- Computer Vision, Hardware Test Automation, Internal Tool Development, Quick Learning & Adaptation, Knowledge Sharing, Teaching
